Re: Medication Policy

Dear Parents,

The Portland Archdiocese's medication policy states, "Only medication that is required for the student to remain in school will be administered."

Self-medication of prescription and non-prescription medication is not allowed except in cases where a student must carry such medication on his/her person for immediate access. An example would be a student who has asthma and needs immediate access to their inhaler. (Both forms must be filled out for this exception.)

If your child must take prescription medicine during the school day, you must completely fill out the *Authorization for Medication Administration by School Personnel* form (copy below), returning it and the medicine (in its <u>original packaging</u>) to the school office. Instructions must be clear and concise. The school office will administer the medicine to your child per your instructions. It is the parent's responsibility to ensure that the school is informed, in writing, of any changes in medication instructions.

If your child uses a prescription inhaler, it can be stored in the school office's medication file for your child to access or your child may carry and self-administer this medication as prescribed. If you choose to have your child carry it with him/her, you must complete the Self-Medication Agreement for Prescription Inhalers form (copy below) AND the Authorization for Medication Administration by School Personnel form (copy attached).

Students that have an epi-pen on file with the school must complete the *Authorization* for *Medication Administration by School Personnel* form **AND** the Food Allergy & Anaphylaxis Emergency Care Plan (copy attached).

Please note that we are not able to administer medication in the school office on an "as needed" basis. If you have any questions, please contact the school office.

Sincerely,

Katy Smith Principal

### **Self-Medication Agreement for Prescription Inhalers**

Students who are developmentally and/or behaviorally able, will be allowed to self-administer prescription inhalers, subject to the following:

- 1. Self-administration of prescription inhaler requires permission from parent, school administrator and physician. Physician consent is to be included on the prescription label or on the medication consent form.
- 2. The inhaler must be kept in its appropriately labeled, original container, as follows:
  - Prescription inhaler label must specify the name of the student, name of the medication, dosage, route, and frequency or time of administration and any other special instructions. Physicians consent for self-administration is to be on the label or medication consent form.
- 3. Sharing and/or borrowing of the inhaler with another student is strictly prohibited.
- 4. Permission to self-medicate may be revoked if the student violates Archdiocesan school policy governing administration of non-injectable medication and/or these regulations.

I have read and agree to the above criteria and give permission for my child to carry

### FOOD ALLERGY & ANAPHYLAXIS EMERGENCY CARE PLAN

#### HOW TO USE AUVI-Q® (EPINEPHRINE INJECTION, USP), KALEO

- Remove Auvi-Q from the outer case. Pull off red safety guard.
- Place black end of Auvi-Q against the middle of the outer thigh.
- 3. Press firmly until you hear a click and hiss sound, and hold in place for 2 seconds.
- Call 911 and get emergency medical help right away.

#### HOW TO USE EPIPEN®, EPIPEN JR® (EPINEPHRINE) AUTO-INJECTOR AND EPINEPHRINE INJECTION (AUTHORIZED GENERIC OF EPIPEN®), USP AUTO-INJECTOR, MYLAN AUTO-INJECTOR, MYLAN

- Remove the EpiPen® or EpiPen Jr® Auto-Injector from the clear carrier tube.
- Grasp the auto-injector in your fist with the orange tip (needle end) pointing downward. With your other hand, remove the blue safety release by pulling straight up.
- Swing and push the auto-injector firmly into the middle of the outer thigh until it 'clicks'. Hold firmly in place for 3 seconds (count slowly 1, 2, 3).
- Remove and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.

### HOW TO USE IMPAX EPINEPHRINE INJECTION (AUTHORIZED GENERIC OF ADRENACLICK®), USP AUTO-INJECTOR, AMNEAL PHARMACEUTICALS

- Remove epinephrine auto-injector from its protective carrying case.
- 2. Pull off both blue end caps: you will now see a red tip. Grasp the auto-injector in your fist with the red tip pointing downward.
- Put the red tip against the middle of the outer thigh at a 90-degree angle, perpendicular to the thigh. Press down hard and hold firmly against the thigh for approximately 10 seconds.
- Remove and massage the area for 10 seconds. Call 911 and get emergency medical help right away.

#### HOW TO USE TEVA'S GENERIC EPIPEN® (EPINEPHRINE INJECTION, USP) AUTO-INJECTOR, TEVA PHARMACEUTICAL INDUSTRIES

- Quickly twist the yellow or green cap off of the auto-injector in the direction of the "twist arrow" to remove it.
- Grasp the auto-injector in your fist with the orange tip (needle end) pointing downward. With your other hand, pull off the blue safety release.
- Place the orange tip against the middle of the outer thigh at a right angle to the thigh.
- Swing and push the auto-injector firmly into the middle of the outer thigh until it 'clicks'. Hold firmly in place for 3 seconds (count slowly 1, 2, 3).
- Remove and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.

#### HOW TO USE SYMJEPI™ (EPINEPHRINE INJECTION, USP)

- When ready to inject, pull off cap to expose needle. Do not put finger on top of the device.
- Hold SYMJEPI by finger grips only and slowly insert the needle into the thigh. SYMJEPI can be injected through clothing if necessary.
- After needle is in thigh, push the plunger all the way down until it clicks and hold for 2 seconds.
- Remove the syringe and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.
- Once the injection has been administered, using one hand with fingers behind the needle slide safety guard over needle.

#### ADMINISTRATION AND SAFETY INFORMATION FOR ALL AUTO-INJECTORS:

- Do not put your thumb, fingers or hand over the tip of the auto-injector or inject into any body part other than mid-outer thigh. In case of accidental injection, go immediately to the nearest emergency room.
- If administering to a young child, hold their leg firmly in place before and during injection to prevent injuries.
- 3. Epinephrine can be injected through clothing if needed.
- Call 911 immediately after injection.

OTHER DIRECTIONS/INFORMATION (may self-carry epinephrine, may self-administer epinephrine, etc.):

Treat the person before calling emergency contacts. The first signs of a reaction can be mild, but symptoms can worsen quickly.
